Professional Summary

AI-Assisted Frontend Engineer with a unique 20-year foundation in business operations, supply chain logistics, and team management. Drawing from extensive experience at Zion Market and Seoul Club, I bring a deeply pragmatic, user-centric approach to software development. I specialize in building robust frontend architectures with a relentless focus on system stability, implementing strict Try-Catch error handling and Type-Guards to prevent UI crashes and Race Conditions. I am passionate about translating real-world operational friction into seamless, resilient software solutions.

Core Competencies & Skills

- **Frontend Engineering:** Next.js, React, TypeScript, Tailwind CSS
 - **Backend & Integrations:** Supabase, REST APIs, OpenAI API, RevenueCat
 - **Business Operations:** Operations Management, Supply Chain Logistics, Vendor Relations, Inventory Control, Cross-functional Leadership
 - **Tools & DevOps:** Cursor, Git, Vercel
-

Professional Experience

Lead Developer | Dream Visualizer

Independent Project

- Engineered and launched "Dream Visualizer", an AI-powered web application built entirely from scratch without templates.
- Designed a robust Next.js/React architecture with Supabase for secure state and database management.
- Implemented strict Try-Catch & Type-Guards to prevent UI crashes and Race Conditions during complex OpenAI API integrations.
- Orchestrated a 20-person Closed Beta Testing (CBT) phase, actively managing user feedback loops for iterative UI/UX improvements.
- Integrated RevenueCat for seamless and secure in-app subscription logic.

Operations Manager | Zion Market

United States

- Managed complex daily inventory workflows and navigated supply chain bottlenecks in the fast-paced US grocery market.
- Directly managed operations that accounted for 80% of total store revenue, optimizing profitability and efficiency.
- Led vendor negotiations and resolved critical inventory crises, developing a deep empathy for operational efficiency.
- Experienced first-hand the impact of failing internal tools, driving my transition into software engineering to build reliable, crash-free operational dashboards.

Assistant Manager | Seoul Club

Seoul, South Korea

- Oversaw daily club operations, delivering exceptional service and maintaining rigorous quality standards.
- Managed cross-functional teams and facilitated clear communication between departments to ensure smooth day-to-day operations.
- Developed strong organizational, conflict-resolution, and problem-solving skills in a high-touch, fast-paced environment.
